

TIE BREAKERS

Within Pools:

1) Record - This is technically based on winning percentage which is computed as follows: (Wins) / (Losses). For example, if one team is 2-1 and another is 1-2, the team with two wins has a higher win percentage (.67) than the team with one win (.33).

2) Head to Head - This breaks ties based on the record against the teams tied with. For example, if 2 teams have the same overall pool play record at 2-1, and they each played the same number of games against the same opponents, then the team that won the head to head match up between these two teams is the higher seed. In the example below, team A would be the higher seed over team B.

Match up	Winner	Team	Wins	Loses
A vs B	A	A		
C vs D	C	B		
A vs C	A	C		
B vs D	B	D		
A vs D	D			
B vs C	B			

3) Pt Diff - The differential tie breaker determines the total difference between a team's score versus their opponents. The largest differential wins the tie breaker.

4) Pts Allowed - The total of a team's opponents score. The smallest total wins the tie breaker.
